

Raxa Security Services Ltd.

ISO 9001:2015, ISO 18788:2015 Company
with ISO 29993:2017 Certified Academy

A premier security solutions company of
GMR Group

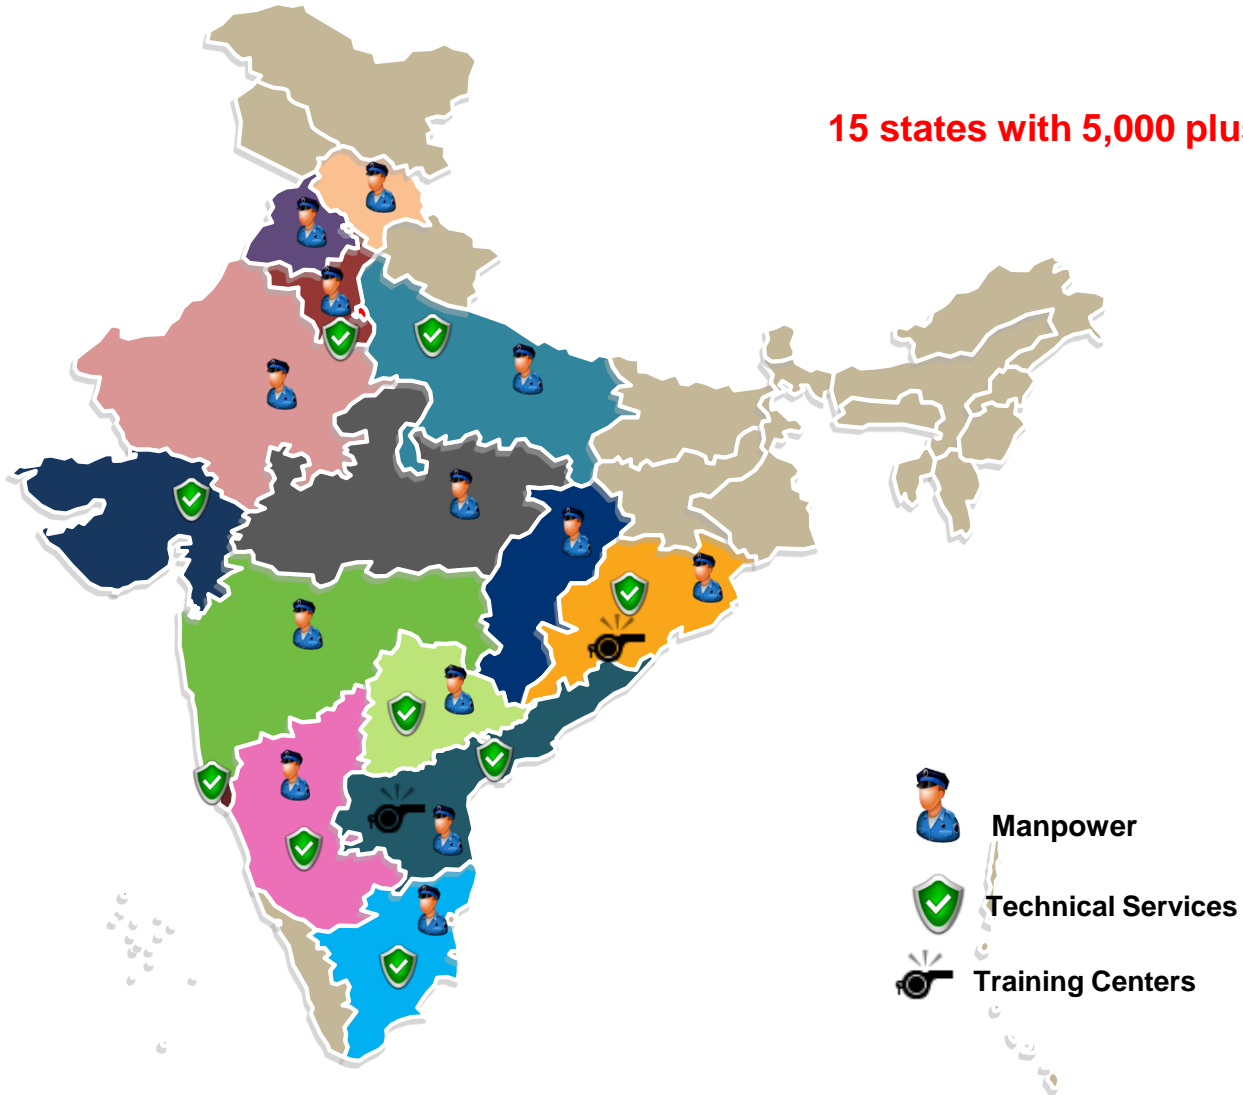

- Raxa Security Services is a GMR Group company founded in 2005, initially to meet the security requirements of the Group companies.
- Since 2011, Raxa started providing security services to external clients also & now it has got a diverse portfolio of clients that includes renowned companies in Manufacturing, Pharmaceutical, IT, Hospitality & Educational sectors as well as Government establishments. Currently it employs more than 5500 security personnel.
- More than undertaking premier guarding services, our expertise lies in providing techno security solutions. Raxa's Technical Division has very high capability in providing integrated technical security and fire safety solutions. It has designed and commissioned these solutions for government, PSUs and other clients.
- With the combined expertise of GMR Group in Aviation and that of Raxa in Security & Safety, we are in a position to provide a variety of Security & safety solutions to Aviation sector
- Raxa has now established a full fledged Fire Division with capability to install, maintain and operate fire systems and also impart high level training in various aspects of fire safety.
- Raxa has also established a dedicated cyber division to provide even digital security in addition to physical security
- Raxa provides very high level of security training not only to its security personnel but outside clients also. Raxa Academy has now transformed itself into a "Centre for Higher Learning in Safety and Security" and conducts several short-term thematic Courses on various aspects of security and safety. Raxa Academy has recently been recognized as Centre of Excellence in Security Sector by MEPSC (Management and Entrepreneurship and Professional Skills Council)
- In addition, Raxa provides niche security services such as Canine, QRT/SOT, Event Management, Executive Protection and Risk Assessment & Management,

15 states with 5,000 plus personnel

Vision

To be a leader in the safety and security industry in thought and action.

Mission

- To provide world class safety and security to Industrial and Business Establishments.
- To use the latest security technology for continually enhancing the standards of the security solutions that are provided to the customers and at the same time give value for money to the customers through such technical and integrated security solutions.
- Stay committed to the highest standards of excellence. Maintain high ethical standards, honesty and integrity. Respect and encourage individual ability and creativity.

Fire Safety Solutions

- Design cost effective security technology solutions for critical infrastructure protection
- Supply, Installation and Commissioning of a range of security systems
- Quality and timely delivery through strong partnerships with OEMs and Associate Companies

- Employs a pool of experienced technical security professionals from Defense, Central Police Organizations & the Industry with engineering background
- Partnerships with some well established as well as promising start ups to provide a wide range of specialized and customized technical security and safety solutions
- Healthy associations with best-in-class OEM
- Develops security solutions with optimum mix of man power & technology
- Designing appropriate and cost-effective security systems - just-right & scalable
- Integration of Technical security systems
- Annual Maintenance Services for Security Systems
- Technical Security audits

Process Automation and Integration of existing standalone systems

- Integrated Physical Security, Access Control and Entrance Automation
- Automatic Identification and Data Capturing System
- Video Analytics based CCTV Surveillance
- Fire alarm & public address systems
- Building management systems (Smart Building Solutions)
- Command & Control Centre
- Screening systems for person, material and vehicle
- Smart Parking Management
- Explosive detection systems

Special Security Solutions & Services

- Smart ATM Security-Video Analytics, Remote Monitoring & Investigation
- Geo-fencing and remote surveillance
- Automatic Number Plate Recognition
- Security as a Service(SaaS)
- Multiple Biometrics –Finger Print, Palm vein, Hand Geometry, Facial Recognition
- Boom Barrier for entrance control of vehicles.
- Hydraulic Bollards to restrict forced entry or exit.

Smart Building Solutions

Our intelligent Building Management System technologies are designed to provide insights on how to improve and control the buildings' efficiency and productivity using the Core Software. It integrates and controls the below systems: (1) Security, (2) Fire detection, (3) Access controls, (4) HVAC systems, (5) Escalators and moving walkways

Drone based services

In partnership with Skylark Drones

The AI powered drone can be used for security surveillance which also monitors various other aspects from construction progress to asset maintenance. Worksite boundaries can be identified and intrusions can be detected. Safety audits can be carried out and alerts can be generated. A variety of solutions are provided in the following segments

1. *Security and surveillance*
2. *Mining*
3. *Power & Utility*
4. *Forests*
5. *Railways*
6. *Highways*
7. *Agriculture*
8. *Training*

Intrusion Detection Systems

The multi-sensor enabled intrusion detection system creates end-to-end encrypted solution which is capable of distinguishing between intrusion by human and animal. Besides ground intrusion detection, there are solutions for drone detection.

Command and Control Centre Solution

In partnership with

Our Command and Control Solution comes with a proven Israeli based robust technology and ease of operation with features that are far superior than any of the conventional Command & Control Centre solutions.

It seamlessly integrates technology, procedures, and personnel into one command and control center, enabling user to effectively manage all security operations from one screen.

The system gathers information from several sources to manage incident(s) and provide situational awareness effectively in the least possible time. The System is flexible and based on an open architecture with advanced algorithms for connecting third-party Systems and components. It employs a highly advanced user-friendly interface, together with a rich set of apps for mobile devices, all securely managed.

Specialized Optronic Surveillance Solutions

In partnership with

The specialized optronic surveillance solutions include a wide range of day cameras, cooled and uncooled infrared cameras, automated pan & tilt turrets, for fixed and mobile systems.

Unlike various other surveillance solutions available in the market, we provide rugged cameras capable of withstanding extended temperature range, and high pressure and having surveillance range upto 21 km, apart from cameras for short and medium distance surveillance.

The solutions are open to integration by a third party and can be used as turn-key and ready-to-use smart stand-alone multi-sensor products.

Screening Solutions

In partnership with

Effective Container Screening is an integral part of port security function. We install, maintain and provide training on X-Ray Container screening system for Sea Ports.

In addition, we also provide Cargo Screening Systems with a range of X-Ray scanners designed for large cargo and palletized goods. Our Screening Solutions also provide mass screening of people for explosives and weapons at airports/railway stations/malls/big office complexes, with productivity in terms of processing for exceeding the conventional DFMDs/HHMDs with different levels of X-Ray penetration.

Misinformation and Disinformation Handling Solution

In partnership with **Logically.**

In today's digital world misinformation and disinformation causes a lot of harm to governments and corporates alike. While rumours, based on disinformation/misinformation on digital media, spread like wild fire and can lead to serious public order issues, they can cause enormous damage to financial and reputation standing of any company. The harmful content/half truths/fake news available in the online media may create a havoc for any organization or individual.

Multiple methods are deployed to cause damage to Governments or Corporates and individuals through misinformation/ disinformation. Late interventions don't adequately limit harm and there is risk of backfire effect. What is needed is proactive and early detection of such information and the source of the same.

Our AI and deep learning based solution goes much beyond simple checking of facts to identification of the clusters where the information is spreading, the source of the misinformation, and even generation of confidential information about the source.

Design, Supply, Installation, Testing, Commissioning and Maintenance of Biometric Enabled Access Control system (BEACON) for 12000 employees, encompassing entry/exit Fingerprint readers, Proximity Card Readers, Hand Geometry Readers, Turnstiles & communication software interface

Complete Physical Security Integrated Solution with multi-layered and redundancy-built IT networked systems comprising of IR illuminated night-vision capable IP Video surveillance system over perimeter, gates and Solar power fence based Perimeter intrusion detection system, Biometric-Palm vein and finger print based Access Control System operating turnstiles/arm/boom Barriers, Key management system with uninterrupted power supply Infrastructure.

CCTV surveillance system with IR illuminators networked to a Command & Control Centre using an integrated video management system & central monitoring system, supported by green power initiative using solar power.

Comprehensive IP CCTV Surveillance system with a seamless integration of legacy systems with new cameras on a versatile video management platform.

Visakhapatnam Port Trust

Unified Threat Management system consisting of an advanced IP based CCTV surveillance system including thermal imaging on wired and wireless (point-to-multi-point) connectivity and an integrated command & control center.

Physical protection system for a critical installation comprising Perimeter Intrusion Detection System, microwave barriers and PIR detectors, integrated with CCTV system and Distress Alarm System.

Design and implementation of IP CCTV Surveillance network with monitoring system for perimeter over a reliable IT networking and power supply platform.

Fire Consultancy

Raxa has established a dedicated Fire Division to provide all fire related services in an integrated manner and it has the following capability related to Fire.

Operational Capability:

- All Raxa personnel are trained in fire & safety as part of their basic training.
- Most of the officers in Raxa are drawn from CISF and Armed Forces. Several of them have specialized credential in fire safety having undergone long term courses in the subject.
- Raxa is currently providing fire support services to all thermal power plants of the GMR Group. We have extended our services to Kia Motors, the South Korean automaker, having its manufacturing facility in Anantapur district of Andhra Pradesh and some other customers.
- Raxa takes care of fire safety on the landside of all GMR Airports in India.
- We have capability of conducting fire audits and various other consultancy services related to fire safety.

Technical Capability

- The Technical Division of Raxa has the capability to design and install sophisticated fire system comprising both fire detection and fire suppression systems on a standalone basis or as part of the overall building management system.
- Raxa can provide the entire gamut of fire safety equipment and take care of their maintenance.
- Raxa develops security solutions with optimum mix of manpower & technology also conducts Technical Security audits

Training Capability

- Raxa Academy offers higher level fire training courses on its own as well as in collaboration with GMR Aviation Academy, which is an entity of GMR Airports Ltd.

Operations:

Highly Trained Fire Manpower Deployment for Fire Operations along with the required equipment

Technical:

- a. Installation and Maintenance of Fire systems comprising Fire Alarm and Fire suppression systems as well as portable fire equipment on a standalone basis or as part of the overall building management system

Training:

- a. We conduct specialized Fire Training Courses at Raxa Academy and also at client locations.
- b. Airport Rescue and Fire Fighting Courses offered at Raxa Academy in collaboration with GMR Aviation Academy:
 - Basic Fire Safety Course (ARFF)
 - Advance Fire Safety Course (ARFF)

Fire Training Courses		
S. No.	Course	Duration
1	International General Industry Safety Card - Level 1 (IGISC)	03 days
2	International Special Industry Safety Card - Level 2 (IGISC)	05 days
3	International Authorized Safety Professionals Level 5 (IASP)	30 days/90 days (Diploma Course)
4	Corporate Fire Rescue & Evacuation Program	01 day
5	Corporate First – Aid Programs	01 day
6	Practical Fire fighting drills (at GMR Warora Energy Ltd.)	15 days

Sale and service of fire equipment

Bangalore Airport	80

Raxa has a State-of-the-Art Academy, spread over 100 acres of land located on Bengaluru – Hyderabad National Highway (NH-44), at a distance of about 80 km. from Bengaluru Airport.

Academy has a capacity to train about 500 trainees at a time. There are class rooms with latest audio visual aids, parade & outdoor training grounds with obstacle courses, sports facilities, barrack accommodation, large dining hall, power back up with generator etc.

The Academy has faculty/trainers drawn from various forces like Army, CISF and Paramilitary and is headed by a highly competent ex-armed forces officer having rich experience in training.

The trainees are well trained in Physical Drills / Exercises, Unarmed Combat skills (UAC), First Aid, Fire Safety, Disaster Management, Industrial / Airport Security, handling of Technical equipment, professional conduct, use of computers, etc.

Raxa Academy has now transformed itself into a “**Centre for Higher Learning in Safety and Security**” and conducts several short-term thematic Courses on various aspects of security and safety.

For the first time in the country, we will be conducting a highly professional 6-month Security Executive Course to cater to the requirement of Security Officers at entry level in the Corporate World

- Develop effective Incident management based on Root Cause Analysis and remedial resolutions
- Assess Incident situation and coordinate measures to manage & mitigate emergency
- Emergency/ Crisis Plan with Response actions
- Provide professional support to develop efficient response mechanism & Emergency Plan

4. Security Audit & Due Diligence

Security Audit & Review

- Conduct of comprehensive Security Audits
- Develop Security/ Protection Design using the CPTED concept
- Recommendation on best practices and Mitigation solutions

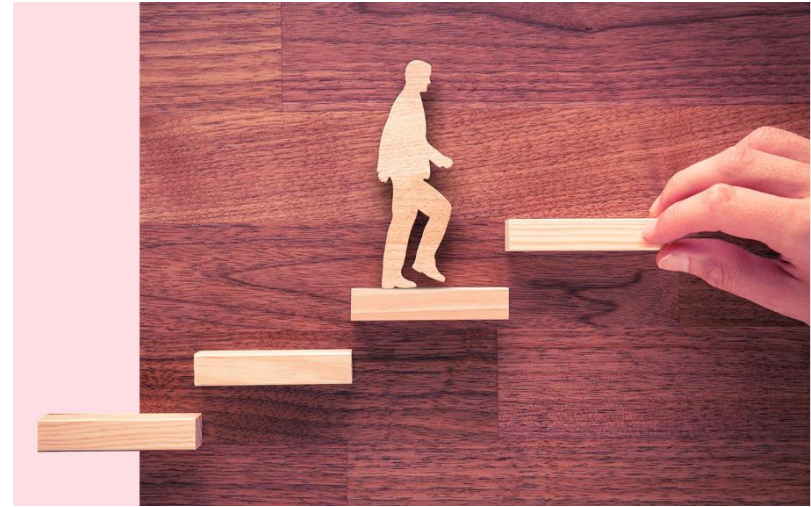

Operational Due Diligence

- Vetting & Evaluation of Organisation security operations
- Recommend Systems, practices and procedures

- At RAXA, we have been making continuous efforts to nurture the talent and skills of employees through the Unnati Platform, to enhance their performance and ultimately improve our service delivery on a continuous basis

UNNATI for Employees

The UNNATI Employee Programme is focused on developing the knowledge and skills of guards and supervisors to enhance their performance and also to provide them growth and career progression opportunities. This is carried out by forming study circles called Abhyasa. Each circle contains about 8 to 10 guards, who meet regularly to share knowledge and skills among themselves. The guards are given counselling & training, enabling employees to study and prepare themselves for competitive exams. Study material is sent to them through whats app Groups formed at different locations

HOW IT WORKS

UNNATI Circles are formed at all the units covering all the Security Guards. Each UNNATI Circles contains not more than 8 to 10 guards.

The UNNATI Circles also take up Kaizen, 5 S Projects and CIPs at respective locations for improvement of security processes.

Counselling and training are given to employees for self-development and to prepare for competitive exams.

UNNATI Circle members meet regularly to share knowledge among themselves.

Security related study material is shared with them through Smart Phones by the Organization.

UNNATI for Organization

The UNNATI for Organization Programme is designed to achieve organizational development through the GMR Business Excellence Model, enabling the business to build capabilities to adapt efficiently and effectively to rapidly changing business environment. The initiative adopts a PDCA model to continuously improve processes for delivering better customer service while optimizing the cost, ensuring business growth and achieving better employee satisfaction.

ISO 18788:2015: The **Standard for Security Operational Management System**, which was enacted only in 2015. Raxa is probably the first organization in India and definitely one among the few, not only in India but world over, to get this certification.

ISO 9001: 2015: Raxa upgraded its quality Certification from ISO 9001-2008 to ISO 9001-2015

ISO 45001: 2018: The standard for “**Occupational Health and Safety**”

ISO 29993:2017: Raxa Academy is certified for ISO 29993-2017, the **Standard for Learning Services Outside Formal Education**.

Centre of Excellence: Raxa Academy has been conferred the recognition of “**Centre of Excellence**” in Security Sector by MEPSC (**Management and Entrepreneurship and Professional Skills Council**)

Raxa is affiliated to **Fire and Safety Forum** (Accredited to American National Standard Institute, ANSI and is also a member of Quality Council of India and NITI Ayog).

Raxa is also member of **Fire and Security Association of India, Bangalore** Chapter.

Raxa Academy is recipient of the following awards from SSSDC – Security Sector Skill Development Council:

- ✓ Outstanding Performance in conduct of Training
- ✓ Model Training Centre
- ✓ Best Training Centre (South)
